MAINTENANCE

Impact and test your light and bracket apparatus before every ride.

Keep your light clean and free of dirt, be careful when cleaning any mud or dirt from lens to avoid scratching.

Never use a high pressure spray or hose on your light.

Do not use harsh abrasive or corrosive materials to clean your light.

For extended periods when your light is not in use fully recharge the light once a month, as a long duration with no charge is detrimental to the cells.

WARNING

Exposure Lights are very powerful lighting systems, please take care when operating. Do not look directly into the light or shine directly at others, including other road users.

Exposure Lights (Ultimate Sports Engineering Ltd) accept no liability for any injuries or other damages arising from the use of their product in any circumstances.

NOTE: Patents apply.

WARRANTY & SERVICE

Please do not send any products back to us without contacting our service team first to discuss your issue and for a valid return number.

All out lights come with a 2 year warranty.

If you have a servicing or technical question you can contact us using the information below. If you return your light for repair, no work will be carried out until you have been contacted with the cost for the repair. If you are outside of the UK it would be quicker in the first instance to contact your local distributor.

USER GUIDE

CHARGING

FULLY CHARGE YOUR LIGHT BEFORE FIRST USE

Locate the USB charging port by pulling away and down on the tab of the silicone band where the USB symbol is etched onto the light's body.

FULLY INSERT THE USB CHARGING CABLE AND BEGIN CHARGING FROM A USB SUPPLY.

An LED behind the lens will flash green to indicate that it is charging and then turn solid green when the light is 85% charged, then the remaining 5% is trickle charged.

Approximate charge times from a 500 mA supply are:

Link/Trace/TraceR: 1.5 hours
Link/Switch: 7 hours

IMPORTANT: After charging is complete correctly replace the silicone band to prevent water ingress.

LIGHT OPERATION & BATTERY LIFE

To turn the light on press the function button twice in quick succession.

Switch/Trace/TraceR: The light will turn on in the mode that was last used. A single press of the function button will cycle between a constant beam and a pulse.

Link/Link+: The light will turn on in the mode that was last used. There are 7 modes that include having either the front or rear LED lit, press the function button once to cycle to the next mode.

To turn the light off hold the function button down until there is a double flash and then release.

Immediately after the light is turned off the LED colour indicates the percentage (see table) of the remaining battery life, functioning as a Fuel Gauge.

NOTE: The angle of the light can be adjusted by rotating and fitting the ball joint.

HANDLEBAR MOUNTING - SWITCH & TRACE

The shorter arm of the Switch bracket faces the front. The tab end of the silicon band fastens on the rear.

WARNING: Ensure that brake and other cables do not catch on the light or its bracket.

HELMET MOUNTING - LINK & LINK+

Try the short bolt first; if this isn’t long enough use the longer bolt. Do not over-tighten.

Requires a 5mm hex key.

NOTE: The angle of the light can be adjusted by rotating and fitting the ball joint.

MADE IN GREAT BRITAIN
DAYBRIGHT

We recommend using your light in Daybright mode during the day for your safety.
To access Daybright mode you need to be in Program 1 for the Switch, Trace, and Trasall, or High for the Link and Link+, and then cycle to the Flash mode using the function button.

OPTIMISED MODE SELECTOR (OMS)

OMS allows you to select a burn time tailored to your needs. The longer the burn time the lower the lumens output. If you double burn time, you half lumens output.

OMS SWITCH, TRACE & TRACE R

There are three programs to choose from that are shown on the light body.
With the light off press and hold the function button, after 2 seconds the light will flash once, twice then three times. These flashes correspond to the different programs and you release the function button after the appropriate flash. e.g. to access Program 2 you release the function button after the 2nd flash.

The light will then remain in the selected Program, regardless if being turned on and off, until another Program is selected.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

An abbreviated version of the table is etched onto the light.

Pgm - Program
C - Constant
F - Flash
H - High
M - Medium
L - Low

A WARNING: The Trasall bracket is angled so the light will shine directly back when correctly attached, make sure it is in the correct orientation.

LINK LINK+

There are three programs to choose from: 1 High, 2 Medium and 3 Low and the burn times are shown on the light body.

With the light off press and hold the function button, after 2 seconds the light will flash once, twice then three times. These flashes correspond to the different programs and you release the function button after the appropriate flash. e.g. to access Program 2 Medium, you release the function button after the 2nd flash.
The light will then remain in the selected Program, regardless if being turned on and off, until another Program is selected.
